## Evidencia construcción del Backend

Como evidencia de la construcción del *Backend*, se anexan capturas de pantalla donde se evidencia el proceso de construcción.

A screenshot of the Visual Studio Code interface. The title bar says 'index.js - BackG12 - Visual Studio Code'. The left sidebar shows a file tree with a folder named 'BACKG12' containing subfolders 'config', 'controllers', 'middleware', 'models', 'routes', and files like 'index.js', 'package.json', and 'variables.env'. The main editor area displays the code for 'index.js':

```
const express = require("express");
const conectarDB = require("./config/db");
const usuarioRoutes = require("./routes/usuarioRoutes");
const auth = require("./routes/auth");
const categoriasRouters = require("./routes/categoriasRouters");
const productosRouters = require("./routes/productosRouters");
const cors = require("cors");

const app = express();
app.use(express.json({ extended: true}));

conectarDB();
// habilitar cors
app.use(cors());

//rutas
app.use("/api/usuarios", usuarioRoutes);
app.use("/api/auth", auth);
app.use("/api/categorias", categoriasRouters);
app.use("/api/productos", productosRouters);

app.listen(4000, () => {
  console.log("servidor corriendo en el puerto 4000");
});
